2008	32,119	2,439.8	2413.2 - 2466.6	2,515.5	2487.6 - 2543.6
2009	33,229	2,520.6	2493.6 - 2547.8	2,607.4	2578.9 - 2636.2

Data Source: Maine Hospital Inpatient and Outpatient Databases; Maine Health Data Organization.

Mental Health ED Visits are defined as emergency department visits of Maine residents for which mental health was the primary diagnosis, coded as CCS 650-652, 655-662, and 670.

Crude rates are ED visits per 100,000 population.

Age-adjusted rates are ED visits per 100,000 population age-adjusted to the U.S. 2000 standard population.

95% CI: 95% confidence interval of the rate.
